BARD® TRUGUIDE® Disposable Coaxial Biopsy Needle with Depth Stop and Additional Blunt Tip Stylet, 17g x 7.8cm
BARD® TRUGUIDE® - C1810A
 Device Description: A rigid, non-powered device designed to direct a sharp needle (not included) into its proper course when performing a clinical and/or surgical procedure; the guide itself is not intended for percutaneous access (not a guide-catheter). Dedicated needle guides are available for many different procedures such as guides for urethral injections, guides for transrectal prostate biopsy, image-guided (e.g., ultrasound, MRI) for percutaneous punctures and nerve blocks, guides for electromagnetic device tracking systems, and guides for stereotactic breast biopsies. Disposable imaging-supportive devices (e.g., ultrasound transducer cover) may be included with the device. This is a single-use device.
